

HELMETS

Each LS2 helmet, in fiberglass, composite or polycarbonate is composed of three main elements, the external shell, shock absorbing EPS liner and the numerous accessories such as comfort linings, method of retention, visors and ventilation.

The two main methods of production are as follows:

- Polycarbonate injected in a mix of ABS utilizing an exclusive process developed by our researchers named HPTT (High Pressure Thermoplastic Technology Resin). This high precision industrial process utilizes molds sculpted from blocks of metal weighing several 100 kilos.
- Composite fibers, combined with polymer resin which provide high abrasion resistance and are very difficult to penetrate

FLIGHT SUITS

Manufactured to the highest standards using quality waterproof, windproof, chemical proof and flame resistant outer fabric on the Flight Suits and Exeat styles and Thinsulate thermal insulation is used through the range giving excellent protection from the cold.

All Flight suits are locally manufactured and each stitch is taken with pride. The suits can be tailored to your need at special request.

Images may differ as upgrades and changes are made without prior notice always ask us what the latest features are on the suits

INTERCOMS

The SMH5 series provides two-way intercom functionality that keeps you connected to your flying companion for conversations and music sharing through the crystal clear Bluetooth® stereo headset.

The SR10 Two-way Radio Adapter allows you to talk wirelessly with two-way radio devices via Bluetooth® 2.1+EDR.

It also provides a hands-free gateway for mobile phones and is compatible with standard stereo or mono Bluetooth® headsets.

AMPtronic

AMPtronic is an innovative company, specializing in the manufacture of digital avionics, for microlight and trike AMPtronic is an innovative company, specializing in the manufacture of digital avionics, for microlight and trike enthusiasts. A couple of highly specialized engineers with experience in the research and development of electronic and radio controlled guidance systems, formed the company some time ago.

AMPtronic manufacture extremely rugged, compact and sophisticated instrumentation branded as Skydat, and at a very affordable price.

You may rest assured that these products are top quality and would make any hardened aviator drool with anticipation!

SERVICES & REPAIRS

The foundation of our business is to offer the best after sales services on all our products.

To take it one step further we are offering service and repairs on any other brands of intercoms, radios, headsets and instruments. We offer on all our works 12 months warranty or money back guarantee!!!

Manufacturing:

We are in progress of developing an all new COST effective wired intercom system that will work with any other brand type Headsets with the dual Speaker and Microphone plugs...and new system installations!

Instrument panel wiring:

Such as new Banana and Tpod setups and wiring. We will also come to your field to solve any wiring problems, Intercom interferences and new system installations!
